

## GOVERNMENT WAREHOUSE/STORAGE

**Challenge** – An agency of the US Government required multiple warehouse locations to store equipment needed in event of a national disaster. Different locations had different requirements.

**CTL Solution** – CTL quickly leased multiple warehouse locations. Some locations were static storage locations, some were staffed by government personnel with CTL provided support and some had full CTL provided staffing. This footprint of warehouses was set up to be adjustable to the government's always changing mission requirements.
