

CASE STUDY

WHITE GLOVE

Challenge – A major consumer electronics company was opening a new retail location on a main street in a large metropolitan area. The high-value shipment was the initial stock for store opening.

CTL Solution – CTL provided 5 AM delivery with a lift gate truck, pallet jacks and extra labor. One driver always stayed with the truck while the skids were broken down at the front door and wheeled into the store's secure storage area.

All pallets and wrapping were taken away and disposed of off-site.
